Policy Document of Green Campus / Plastic Free Campus

The Uran Education Society's College of Management & Technology understands how important it is to promote the environment, provide sustainability education, improve health and well-being, achieve cost savings, engage with the community, build resilience, enhance reputation, and foster leadership and innovation. It creates a positive and sustainable learning environment for students and contributes to a greener and more sustainable future. The policy aims to integrate sustainable practices, reduce environmental impact, and promote a culture of sustainability among students, faculty, staff, and stakeholders.

The college focuses on Minimizing the institution's ecological footprint by reducing energy consumption, waste generation, and greenhouse gas emissions. Promote efficient use of water, energy, and other resources to minimize waste and preserve natural resources. Incorporate sustainable design principles into new construction and renovation projects to enhance energy efficiency, water conservation, and indoor environmental quality. Integrate sustainability education into academic programs, research, and extracurricular activities to foster environmental awareness and empower students to become sustainability advocates. Implement effective waste management practices, including recycling, composting, and waste reduction initiatives, to minimize landfill waste and promote a circular economy. Preserve and enhance biodiversity on campus through the creation and maintenance of green spaces, gardens, and natural habitats to support ecological balance and promote well-being.

College Implementing energy-efficient technologies, such as LED lighting, occupancy sensors, and building automation systems, to reduce energy consumption. Install water-efficient fixtures, implement water-efficient landscaping practices, and promote water conservation awareness among the campus community. Prioritizing the purchase of environmentally friendly and energy-efficient products. Promote local and sustainable sourcing practices for campus supplies and services.

Developing infrastructure and policies that support sustainable transportation options, such as bike lanes, pedestrian-friendly pathways, and incentives for using public transit or carpooling. Integrate sustainability education into academic programs, organize workshops, seminars, and awareness campaigns to educate the campus community about sustainable practices and

encourage active participation. Establish a monitoring system to track progress, measure performance, and report on sustainability goals and achievements. Regularly communicate updates and successes to the campus community.

The college ensures compliance with relevant environmental regulations, standards, and guidelines. Continuously review and update the Green Campus Policy to align with evolving best practices and advancements in sustainability. Encourage feedback and suggestions from students, faculty, staff, and stakeholders to foster a culture of continuous improvement and innovation.

The Uran Education Society's College of Management & Technology Green Campus Policy aims to create a sustainable and environmentally friendly campus that promotes environmental stewardship, resource conservation, education, and collaboration.
